

# AdvaCare™ Disinfectant

EPA Reg. No. 1677-193

NEW

**NOW CAN BE USED  
AGAINST SARS-CoV-2<sup>1</sup>,  
THE VIRUS THAT CAUSES  
COVID-19**

**As an Extension of The Healthcare Operation, it is  
Crucial That You Disinfect Your Customer's Linen.**

Hospital linens can be the source of many pathogens that can cause illness.  
Help protect patients, and your customers.

**ECOLAB®**

THE CDC STATES  
THAT EACH YEAR

# 1.7 MILLION HAIs

OCCUR IN  
US HOSPITALS

## Your Customers Worry About...

- ▲ PROTECTING PATIENTS
- ▲ REDUCING HEALTHCARE-ASSOCIATED INFECTIONS (HAIs)
- ▲ UTILIZING SOLUTIONS EFFECTIVE AGAINST EMERGING PATHOGENS
- ▲ PROTECTING THEIR BRAND

Per the Centers for Disease Control and Prevention (CDC), of all the surfaces in a hospital, a patient has the greatest degree of contact with their gown and the bed linens. Disinfecting these linens in your wash process helps ensure the linens are free of potentially harmful microorganisms.

## Patient Safety Starts in the Laundry

Your customers take all measures necessary to prevent or limit the spread of HAIs (like *C. difficile*) and emerging pathogens. As an extension of their operation, YOU CAN HELP. CDC guidance is to process healthcare linens at 160°F for 25 minutes, which can be difficult to achieve. An alternative method is to utilize an antimicrobial chemical intervention, such as AdvaCare Disinfectant, allowing lower temperature and shorter contact times.

## The AdvaCare Disinfectant Difference

AdvaCare Disinfectant is an EPA-registered laundry disinfectant oxidizer with kill claims against 11 microorganisms<sup>2</sup> of concern on healthcare linen, including *C. difficile*; the number one U.S. healthcare-associated infectious microorganism. **Now with an emerging pathogen claim, AdvaCare can be used against SARS-CoV-2<sup>1</sup>, the virus that causes COVID-19**, and outperforms chlorine and peroxide for disinfecting, whiteness, extending linen life, sustainability and overall effectiveness.

## Set Your Laundry Apart

Stand out as the premier laundry destination in town. Using AdvaCare Disinfectant in the wash aisle shows you're going above and beyond for your customers and their patients. You'll be seen as a valued and trusted partner for patient safety.

**AdvaCare Disinfectant is the most comprehensive  
EPA-registered laundry concentrate available for textiles.**

Go beyond wash aisle disinfection with the triple protection of ProTEX PLUS. Talk to your Ecolab representative to learn more.

1 AdvaCare Disinfectant has demonstrated effectiveness against *Clostridioides difficile*, a spore forming organism, on laundered fabric (linen). Spores are the most difficult form of microorganism to kill according to the hierarchy of microorganisms and their resistance to disinfectants. Therefore, AdvaCare Disinfectant can be used against SARS-CoV-2 when used in accordance with the directions for use against *Clostridioides difficile* when added as a disinfecting agent at a rate of 5 fluid ounces per 100 pounds of dry laundry at 160°F and laundry is treated for a minimum of 6 minutes. Refer to the CDC website at <https://www.cdc.gov/coronavirus/2019-ncov/index.html> for additional information.

2 AdvaCare™ Disinfectant is an EPA-registered laundry disinfectant which is utilized in the wash process as an antimicrobial intervention and allows you to disinfect healthcare linens at temperatures as low as 140°F for 5 min. AdvaCare™ Disinfectant has kill claims for *Staphylococcus aureus*, *Klebsiella pneumoniae*, *Pseudomonas aeruginosa*, *Acinetobacter baumannii*, *Escherichia coli* O157:H7, *Listeria monocytogenes*, Methicillin - Resistant *Staphylococcus aureus* (MRSA), Community-associated Methicillin-Resistant *Staphylococcus aureus* (CA-MRSA), *Salmonella enterica*, HIV-1 (AIDS) Virus, Carbapenem - resistant *Klebsiella pneumoniae* (KPC), *Enterococcus faecalis* - VRE, *Clostridium difficile*. Follow EPA label guidance for time, temperature and concentration requirements. The *Clostridium difficile* claim is currently being reviewed by the state agencies including the California Department of Pesticide Registration (CDPR).

- ▲ CAN BE USED AGAINST SARS-CoV-2<sup>1</sup>, THE VIRUS THAT CAUSES COVID-19
- ▲ EFFECTIVE DISINFECTION
- ▲ HELPS PREVENT CROSS-CONTAMINATION IN WASH WATER
- ▲ POWERFUL STAIN REMOVAL
- ▲ EFFECTIVE DISINFECTION AT ≥ 140F FOR ≥ 5 MINUTES<sup>2</sup>
